

Precise Numerical Results

Aflatoxin M₁, a toxin found in milk, is derived from ingested aflatoxin. Aflatoxins are known carcinogens. Detection of aflatoxin M₁ is critical because this toxin is found in milk, a major source of nutrition for infants, children, and adults. Throughout the world, there are significant regulations on the presence of M₁ in dairy products. VICAM's Afla M₁ FL⁺ is the ideal solution to determining levels of M₁ in milk in parts per trillion (ppt) using a fluorometer.

Afla M₁ FL⁺ from VICAM is a rapid aflatoxin test which produces precise numerical results. Using monoclonal antibody-based affinity chromatography, Afla M₁ FL⁺ can isolate aflatoxin M₁ from fluid milk.

Afla M₁ FL⁺ is safe and simple. It can be performed rapidly and requires no special skills. You have the best of all worlds: speed, sensitivity, and simplicity – quick tests for parts per trillion without the need of HPLC. Furthermore, Afla M₁ FL⁺ has a long shelf life. In fact, no other test comes close for speed, quantification, and economy.

BENEFITS

Exclusive – Specifically for HPLC use

Exclusive – Specifically for fluorometer use

Durable – Long shelf life; requires no refrigeration

Quick – 25 minutes to isolate toxin*

Wide Range – Detects levels as low as 12.5 ppt and as high as 200 ppt without HPLC analysis

Safe – Requires less toxic materials than conventional test methods

CULTIVATING SUCCESS THROUGH SCIENCE™:

PREPARE SAMPLE

- Centrifuge
- Remove skim milk portion

BIND AND ELUTE

- Pass sample over AflaM₁ FL⁺ mobile bead column
- Remove frit and wash column
- Elute aflatoxin M₁ from column and collect in a cuvette

MEASURE

- Add developer and place cuvette into a calibrated fluorometer
- Read results in ppt

ORDERING INFORMATION

Cat. No.	Description	Cat. No.	Description
G8044	Afla M ₁ FL ⁺ Basic Equipment Package (110 Volt)	36010	Disposable Plastic Beakers (25 per pack)
G8055	Afla M ₁ FL ⁺ Basic Equipment Package (220 Volt)	32010	AflaTest® Developer (50 mL)
G1047	Afla M ₁ FL ⁺ Columns (25/box)	33040	AflaTest-M™ Calibration Standards
G1106	Afla M ₁ FL ⁺ Single Position Pump Stand (10 mL & 60 mL syringes)	31967	Kim Wipes
G1107	Afla M ₁ FL ⁺ 4-Position Pump Stand (10 mL & 60 mL syringes)	G4033	Micro-pipettor, 1 mL
20050	Graduated Cylinder, 50 mL	G8000 S	Serie-4EX Fluorometer™
20700	Wash Bottle, 500 mL	G1129	Frit Picker
21010	Cuvette Rack	20600	50 mL Bottle Dispenser for Developer
23040	Vortex Mixer	20656	Micro-pipette Tips for 1 mL Micro-pipettor (100)
34000	Cuvettes (250 per pack)	G1118	WB Column Coupling (6)

Also Required; Must be Sourced Locally:

Centrifuge capable of obtaining 2000 x g RCF

* Multiple position pump stands available

The analytical methods presented in this data sheet have been researched and developed by Waters to be used exclusively with AflaM₁ FL⁺ products. These analytical methods have been validated in the Waters laboratories to perform to the specifications indicated in the AflaM₁ FL⁺ procedures. The user assumes all risk in using AflaM₁ FL⁺ analytical procedures and products. Waters makes no warranty of any kind, expressed or implied, other than that AflaM₁ FL⁺ products conform to Waters' printed specification and quality control standards. Waters will, at its option, repair or replace any product, or part thereof, which proves to be defective in workmanship or material. VICAM's undertaking to repair or service such products is exclusive and is in lieu of all other warranties whether written, oral, expressed, or implied, including any implied warranty of merchantability or fitness for a particular purpose. Waters shall have no liability for anticipated or lost profits or any loss, inconvenience or damage whether direct, indirect, incidental, consequential or otherwise, to person or property, or for strict liability or negligence arising from or in connection with the use of these assay procedures or AflaM₁ FL⁺ products.
